

Pre-Public Record Foreclosure Data

- ▶ Increase your profits
- ▶ Beat the crowd. Be the first to know as soon as anyone defaults in your area.
- ▶ Reduced marketing expenses because of higher response.
- ▶ Be several months ahead of everyone else.
- ▶ Have insider information that most likely only you know.
- ▶ Have several months to resolve foreclosure situations

First Come – First Served

At Rapid Foreclosure Data, we can't predict the future, but we can do the next best thing. We help you identify the most promising opportunities well before anyone else knows about them. You will know, within a few days, exactly who in your area has just missed mortgage payments. These people have just defaulted but are not yet in foreclosure. Unlike the vast majority of lists, what you will have is insider information. We sell the data to only one person in each area. The other lists are public record, get widely published and are sold to the masses over and over. With our information, you will be several months ahead of everyone else. Under these conditions, your marketing will be much more effective because you will basically not have competition. Not only that. You will have a lot of time to resolve foreclosure situations such as retail sales, short sales, quick sales, etc. This way, of course, will be more profitable
